

## **GIFTED AND TALENTED**

At Yateley School, we are keen to support all our students in their school career. This includes the students who display a gift and/or talent, for either a specific curriculum area, or indeed, across a number of areas.

Currently students are identified as gifted and talented in one (or more) of three ways: A very high score recognised through testing in Year 7, notification from Hampshire County Council that a student achieved within the top 10% of students in their KS2 testing and subject identification by staff.

In order to ensure that our curriculum develops, stretches, engages and challenges students, we work closely with other schools and education establishments to ensure an innovative and consistent approach to supporting our students' needs.

The Gifted and Talented Programme is an ever growing and developing one and provides exciting opportunities for students across all year groups. It is designed to help students recognise their successes and achievements and to aspire to be the best that they can - no matter where their gift or talent lies.
